

ANTIFOAM PS1 and ANTIFOAM PS2

PRESENTATION

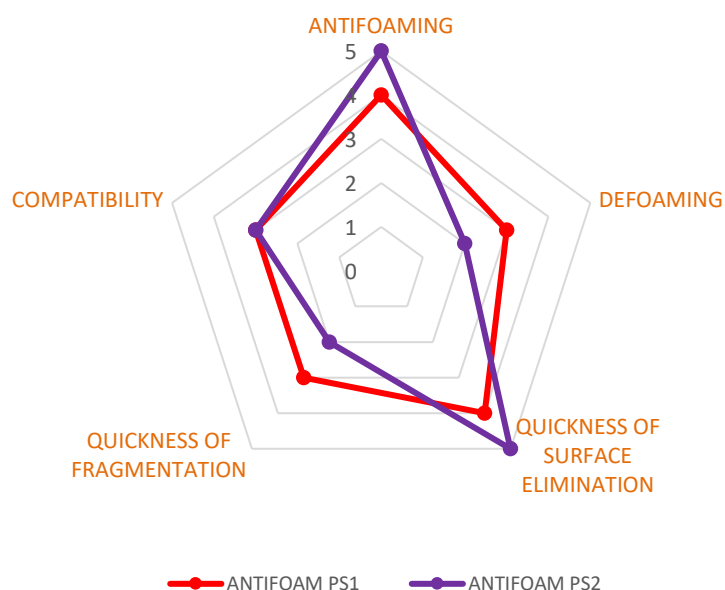

Antifoam PS1 and **PS2** are powdered defoamers based on silicon oils and polyglycols.

ADVANTAGES

- They have a strong air elimination effect (antifoaming).
- They are very effective in the elimination of the air bubbles already during the mixing phase.
- They boost the development of high final strengths.
- They are suggested for repair mortars and viscous systems.

PACKAGING

25 kg paper bags.
