

## ECO AB-05 and ECO AB-B

### OVERVIEW

**Eco AB-05** and **ECO AB-B** are very fine powders of micro particles of **silver salts**. They have a strong and permanent inhibitory effect on the proliferation of bacteria.

### ADVANTAGES

- They remain active for an unlimited period.
- They allow the final products to get the PT2 certification.
- They are not biocides but inhibitors of the bacterial proliferation.
- They are suggested for smooth finishes, putties, and paints.
- Eco AB-B protects the paints in their vases as well, blocking the proliferation of the molds.

### PACKAGING

- 1 Kg bags.
- 3 Kg buckets.
- 10 Kg buckets.
