

PENTAPROOF CA

OVERVIEW

Pentaproof CA is a mass waterproofing additive in powder form made out of metal salts of stabilized fatty acids.

ADVANTAGES

It is very effective against capillary water uptake.

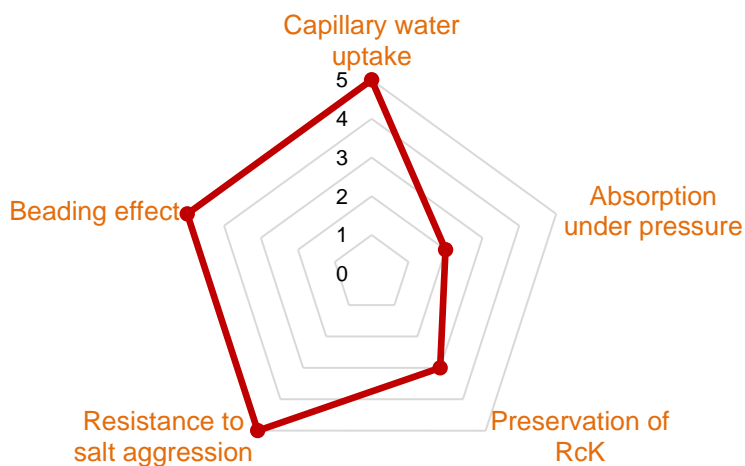

It protects the mortars from efflorescences and salt aggression.

It gives surfaces a pleasant beading effect.

It is suggested for plasters, skim coatings, and tile grouts.

PACKAGING

20 kg paper bags.

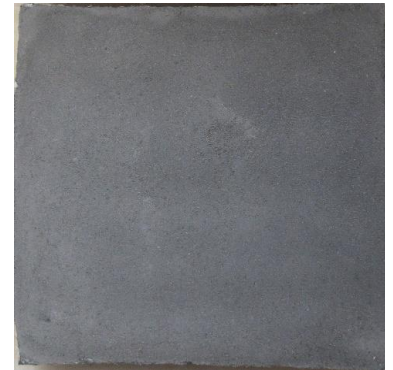

Efflorescences after 60 days exposure to seawater
